Faculty Search Committee
Department of Women's and Gender Studies and Political Science
University of Alberta

Dear Members of the Search Committee,
I am applying for the Assistant Professor position in the Department of Women's and Gender Studies and Political Science at the University of Alberta. I am a PhD Candidate in Computer Sciences at the School of Computing and Artificial Intelligence at the University of Wisconsin–Madison. I am advised by Dr. Rahul Chatterjee, and expect to graduate by Summer 2027.

As a teacher, I strive to cultivate intellectual rigor and compassionate care among students. I have TAed for various fundamental and advanced courses in Computer Sciences. I have also **guest lectured for interdisciplinary courses** in UW–Madison with my papers as course readings in Psychology: Sexual Violence Advocacy and in Social Work: Interpersonal Violence. At U of A, I will incorporate an interdisciplinary perspective while teaching courses on security & privacy, HCI, ethics, information, health, and research methods. My teaching is informed by my research.

My research studies how technology perpetuates **gender-based violence (GBV)**. I study **interpersonal harms (e.g. intimate partner violence, stalking, and AI-generated intimate imagery)** and **structural harms (e.g. trafficking, genocide, and environmental violence)**, especially in rural and Indigenous communities. To prevent harm and foster safety, I design **equitable sociotechnical interventions (e.g. education, tools, and advocacy practices) and research practices (e.g. methods, data, and design practices).** I combine ethnographic, participatory, and design research methods to bridge disciplinary boundaries in and beyond computing (human-computer interaction, security & privacy), sociology (psychology, politics, law, history, anthropology, healthcare), and education. I have made contributions across two interwoven threads: I design **(1) interventions to support GBV survivors and frontline providers**, and propose **(2) research frameworks to resist and liberate from structural violence.** I have **5 published and 4 in-review papers** at top-tier venues, such as **CSCW (honorable mention top 5%), CHI (best paper top 1%), USENIX Security, CCS (finalist at CSAW applied research competition)**. I have also presented papers, panels, and workshops at policy, law, healthcare, and education venues such as Wisconsin State Capitol, American Educational Research Association, Cook County Human Trafficking Task Force, *Gaawiin Geyaabi ("no more")*, and Women Are Sacred.

I value translating research into social impact through a community-engaged interdisciplinary approach, collaborating closely with survivors, advocacy groups, health practitioners, legal justice workers, and policymakers to ensure interventions are safe, ethical, and grounded in lived experiences. I direct the administration, fundraising, outreach, and survivor services at Madison Tech Clinic (MTC), a trauma-informed clinic that supports GBV survivors. I have overseen over 191 consultations (over 40 survivors personally) with their digital safety needs. I coauthored five grant proposals, one of which was **awarded $750,000 from US Department of Justice** to expand our services to 26 rural GBV organizations across 32 counties of Wisconsin, US. This expansion has resulted in us delivering over 50 remote consultations (25% of total consultations) with 15 rural GBV organizations so far. I have **trained over 200 GBV providers** at the nation level (National Network of Ending Domestic Violence), Indigenous level (National Indigenous Women's Resource Center, Courte Oreilles Tribal Nation, Mending the Sacred Hoop) and state level (EndAbuseWI, The Network). I have also been **awarded the Morgridge Fellowship for Community-engaged Scholarship**.

To set up my teaching program, I will build on U of A's existing strengths by teaching fundamental courses in computing, research methods, HCI, Security and Privacy, Information, Ethics, Health, Gender Studies, Decoloniality and Critical Race Theory, and Social Justice. Also, I will bring my interdisciplinary perspective to topics courses on human-centered responsible AI, AI safety, and security and privacy. I have developed a research-focused seminar course on "Decolonial Race, Gender, Technology", for which I have attached a sample syllabus to my application. Finally, I will complement my teaching duties with reciprocity back to communities by establishing a Tech Clinic in Edmonton with GBV organizations in Alberta.

Please feel free to contact me with any questions about my application. Thank you very much for your time and consideration.

Sincerely,
Naman Gupta, PhD Candidate, University of Wisconsin-Madison
