Faculty Search Committee
School of Computer Science
Northwestern University

WISCONSIN
UNIVERSITY OF WISCONSIN–MADISON

Dear Members of the Search Committee,

I am applying for the Assistant Professor position in the School of Computer Science at the Northwestern University. I am a PhD Candidate in Computer Sciences at the School of Computing and Artificial Intelligence at the University of Wisconsin–Madison. I am advised by Dr. Rahul Chatterjee, and expect to graduate by Summer 2027.

My research studies how technologies perpetuates gender-based violence (GBV) such as intimate partner violence, labor/sex trafficking, genocide, and environmental destruction. Specifically, how equitable interventions and research practices can reduce and prevent harm among communities, helping them foster healing and safety. To do this, I combine ethnographic, participatory, and design research methods to bridge disciplinary boundaries in and beyond human-computer interaction, security & privacy, sociology, psychology, education, politics, law, history, anthropology, and healthcare. I have made contributions across two interwoven threads: (1) designing interventions to support GBV survivors and frontline providers, and (2) research praxis to resist and liberate from structural violence. I have published 5 and 4 in-review papers at top-tier venues, such as CSCW (honorable mention top 5%), CHI (best paper top 1%), USENIX Security, CCS (finalist at CSAW applied research competition). I have also presented papers, panels, and workshops at policy, law, and healthcare venues like Wisconsin State Capitol, Cook County Human Trafficking Task Force, *Gaawiin Geyaabi ("no more")*, Women Are Sacred, Reclaiming Our Love, Native Nations Nursing, Helpers, and Healers Summit. I have guest lectured for UW–Madison courses who assigned my papers as course readings in Psychology: Sexual Violence Advocacy and in Social Work: Interpersonal Violence.

Embracing an *advocacy-researcher* practice, I direct the administration, fundraising, outreach, and survivor services at Madison Tech Clinic (MTC), a trauma-informed intervention that supports GBV survivors. I have overseen over 180 consultation (over 40 survivors personally) with their digital safety needs. I coauthored five grant proposals, one of which was awarded $750,000 from US Department of Justice to expand our services to 26 urban and rural GBV organizations across 32 counties of Wisconsin, US. This expansion has resulted in us delivering over 50 consultations (25% of total consultations) with 15 rural GBV organizations so far. I have trained over 200 GBV providers (survivors, health practitioners, legal justice workers, and policymakers) through nation-level (National Network of Ending Domestic Violence, National Indigenous Women's Resource Center, Lac Courte Oreilles Tribal Nation) and state-level coalitions (EndAbuseWI, The Network, Mending the Sacred Hoop). I have also been awarded the Morgridge Fellowship to recognize my community-engaged scholarship.

As a teacher, I strive to cultivate intellectual rigor and compassionate care among students. I will incorporate an interdisciplinary perspective while teaching courses on security & privacy, HCI, ethics, information, health, and research methods. To secure funding, I plan to submit grant applications with national agencies (NSF, DOJ, NIH), foundations (Robert Wood Johnson, Sloane, Ford), NU, and tech companies.

To set up a community-engaged research program, I will build on NU's existing strengths by bringing my interdisciplinary perspective to human-centered responsible AI, AI safety, and security and privacy. I will do this by establishing a Tech Clinic in Chicago with GBV organizations in IL. I already have deep collaborative connections in Chicago with GBV providers at The Network and Cook County Human Trafficking Task Force. I envision collaborating with researchers such as Marcelo Worsley (on issues faced by racially and ethnically diverse communities), Uri Wilensky, Eleanor O'Rourke, Sruti Bhagavatula, and Haoqi Zhang (on role of AI in learning and education), Jessica Hullman (on AI and epistemic justice), Elizabeth Gerber and Darren Gergle (on collaborative and community-engaged technology design), Nicholas Diakopoulos (on algorithmic accountability and transparency), V.S. Subrahmanian (on deepfakes and geopolitical disinformation), Nivedita Arora (on sustanable and equitable AI for social good), in Center for Human-Computer Interaction Design, Center for Advancing Safety of Machine Intelligence, Design, Technology, and Research program, Computational Journalism Lab.

Please feel free to contact me with any questions about my application. Thank you very much for your time and consideration.

Sincerely,
Naman Gupta, PhD Candidate, University of Wisconsin-Madison
