

October 2, 2026

Dear Members of the Search Committee,

I am applying for the Postdoctoral Visiting Fellowship for AY 2027-28 in the Kellogg Institute at the University of Notre Dame. I am a PhD Candidate in Computer Science, School of Computing and Artificial Intelligence at the University of Wisconsin–Madison. I am advised by Dr. Rahul Chatterjee and expect to graduate by Summer 2027.

My research examines **how technologies enables gender-based violence (GBV) such as intimate partner violence, labor/sex trafficking, and ecological extraction**. Specifically, how **equitable, scientific design interventions can detect and prevent harm among impacted communities and help them foster collective safety, resistance, and liberation**. To do this, I combine rigorous data-driven and community-engaged research methods to bridge disciplinary boundaries in and beyond Human-Computer Interaction (HCI) and Security & Privacy (S&P). I have made contributions across two interwoven threads: (1) designing interventions to support interpersonal violence survivors, and (2) research and design framework to help communities liberate from structural violence. I have published 9 peer-reviewed papers (including 4 under review) in top-tier HCI and S&P research venues, such as CHI (best paper top 1%), CSCW (honorable mention top 5%), DIS, USENIX Security, CCS, and NDSS. I have also presented papers, panels, and workshops at interdisciplinary venues like Heidelberg Laureate Forum, Wisconsin State Capitol, Cook County Human Trafficking Task Force Conference, Socialism Conference, Gayabii Gawiin, Women Are Sacred Conference, Reclaiming Our Love Conference, and Native Nations Nursing, Helpers, and Healers Summit. To support my work, I co-authored five grant proposals, one of which was awarded funding from US Department of Justice, Office for Victims of Crime to expand [Madison Tech Clinic \(MTC\)](#) to rural and Indigenous communities. Multiple iterations of PSYCH311: Sexual Violence Advocacy (in Psychology) and SW623: Interpersonal Violence (in Social Work) have assigned my publications as course readings.

Embracing an *advocacy-researcher* practice, I direct the operations and outreach at MTC, a trauma-informed intervention that has supported 180+ survivors with their digital safety needs. I have personally supported 40+ survivors and lead the outreach efforts to spread MTCs' services across 24 organizations in 32 counties in Wisconsin, US. I have trained over 200 health practitioners, criminal justice workers, and policymakers through nation-level ([National Indigenous Women's Resource Center](#), [National Network of Ending Domestic Violence](#), [Lac Courte Oreilles Tribal Nation](#)) and state-level coalitions ([EndAbuse](#), [The Network](#), [Mending the Sacred Hoop](#)). Recognizing my practice, I have been awarded the Morgridge Fellowship for Community-Engaged Scholarship.

As a teacher, I strive to cultivate intellectual rigor and compassionate care among students. I will incorporate an interdisciplinary perspective while teaching courses on ethics, social justice, S&P, HCI, and qualitative research methods. I will setup a community-engaged research program by establishing a Tech Clinic in Notre Dame. To secure funding, I plan to write grants with national agencies (NSF, DOJ, NIH) and seed grants/fellowships through private foundations (Robert Wood Johnson, Sloane), tech companies, and the university. I will build on UND's existing strengths by bringing my interdisciplinary perspective to technological research. I envision collaborating with cross-disciplinary researchers such as Drs. Karla Badillo-Urquiola, Keona Lewis, Megan Levis Scheirer, Suzanne Shanahan, Elizabeth McClintock, Sarah Mustillo, Gwendolyn Purifoye, Muna Adem, Steven Alvarado, Erin McDonnell, Dana Moss, Anna Haskins, Amy Langenkamp, Rory McVeigh through centers such as Kellogg Institute, Center for the Study of Social Movements, Environmental Change Initiative, Notre Dame Environmental Research Center, Institute for Social Concerns, Lucy Family Institute, William J. Shaw Center for Children and Families.

Thank you very much for your time and consideration.

Sincerely,

Naman Gupta, PhD Candidate
