Faculty Search Committee
Department of Health Systems and Population Health, School of Public Health
University of Washington

WISCONSIN
UNIVERSITY OF WISCONSIN–MADISON

Dear Members of the Search Committee,
I am applying for the Assistant Professor in Anti-Racism and Community Health (ARCH) Center position in the Department of Health Systems and Population Health, School of Public Health at the University of Washington. I am a PhD Candidate in Computer Sciences at the School of Computing and Artificial Intelligence at the University of Wisconsin–Madison. I am advised by Dr. Rahul Chatterjee, and expect to graduate by Summer 2027.

My research studies how technologies perpetuates gender-based violence (GBV) such as intimate partner violence, labor/sex trafficking, genocide, and environmental racism. Specifically, how **equitable sociotechnical interventions (e.g. education, tools, and advocacy practices) and research practices (e.g. methods, data, and design practices) can reduce and prevent harm among communities, helping them foster healing and safety**. To do this, I combine ethnographic, participatory, and design research methods to bridge disciplinary boundaries in and beyond human-computer interaction, security & privacy, sociology, psychology, education, politics, law, history, anthropology, and healthcare. I have made contributions across two interwoven threads: **(1) designing interventions to support GBV survivors and frontline providers, and (2) research framework and design practice to resist and liberate from structural violence.** I have published **5 and 4 in-review papers** at top-tier venues, such as **CSCW (honorable mention top 5%), CHI (best paper top 1%), USENIX Security, CCS (finalist at CSAW applied research competition)**. I have also presented papers, panels, and workshops at policy, law, healthcare, and education venues like Wisconsin State Capitol, American Educational Research Association, Cook County Human Trafficking Task Force, *Gaawiin Geyaabi ("no more")*, Women Are Sacred, Reclaiming Our Love, Native Nations Nursing, Helpers, and Healers Summit.

Embracing an *advocacy-researcher* practice, I direct the administration, fundraising, outreach, and survivor services at Madison Tech Clinic (MTC), a trauma-informed intervention that supports GBV survivors. I have overseen over 191 consultations (over 40 survivors personally) with their digital safety needs. I coauthored five grant proposals, one of which was **awarded $750,000 from US Department of Justice** to expand our services to 26 urban and rural GBV organizations across 32 counties of Wisconsin, US. This expansion has resulted in us delivering over 50 consultations (25% of total consultations) with 15 rural GBV organizations so far. I have **trained over 200 GBV providers (survivors, health practitioners, legal justice workers, and policymakers)** through nation-level (National Network of Ending Domestic Violence, National Indigenous Women's Resource Center, Lac Courte Oreilles Tribal Nation) and state-level coalitions (EndAbuseWI, The Network, Mending the Sacred Hoop). I have also been **awarded Morgridge Fellowship** to recognize my community-engaged scholarship.

As a teacher, I strive to cultivate intellectual rigor and compassionate care among students. I have TAed for various fundamental and advanced courses in Computer Sciences. I have also **guest lectured for interdisciplinary courses** in UW–Madison with my papers as course readings in Psychology: Sexual Violence Advocacy and in Social Work: Interpersonal Violence. At UW, I will incorporate an interdisciplinary perspective while teaching courses on security & privacy, HCI, ethics, information, health, and research methods.

I will do set up a community-engaged research program by collaborating with TECC Clinic (New Beginnings) and extend their services across Washington. To secure research funding, I plan to submit grant applications with national agencies (NSF, DOJ, NIH), foundations (Robert Wood Johnson, Sloane, Ford), UW, and tech companies. I will build on UW's existing strengths by bringing my interdisciplinary perspective to community-engaged research and evaluation focused on disrupting structural racism and discrimination towards health equity. I envision collaborating with researchers such as Wendy E. Barrington and Derek R. Jennings (on colonial intergenerational impacts on health of Black and Indigenous peoples), India J. Ornelas and Barbara Baquero (on urban and rural disparities in Latino and immigrant populations), Anjulie Ganti (on gender, sexuality and justice in Indian populations). I will also collaborate with researchers in HCDE, Emily Tseng (on IPV, improving tech clinics, and AI safety), Beth Kolko and Daniela Rosner (on feminist & afro-indigenous AI futures), Sean A. Munson (on health interventions), and Also, in School of Information, Jason Young, Anna Lauren Hoffmann, Temi Odumosu (on social and epistemic justice, decolonial feminist theory), Nassim Parvin, Katie Davis, Yaman Yu (on GBV and youth safety), Kurtis Heimerl (on technology for underresourced communities), Lindah Kotut, Miranda Belarde-Lewis, Clarita Lefthand-Begay, Sandy Littletree, Cheryl Metoyer (on indigenous data sovereignty and community-engagement with tribal nations).

Please feel free to contact me with any questions about my application. Thank you very much for your time and consideration.

Sincerely,
Naman Gupta, PhD Candidate, University of Wisconsin-Madison
