Faculty Search Committee
Human Centered Design & Engineering
University of Washington

WISCONSIN
UNIVERSITY OF WISCONSIN–MADISON

Dear Members of the Search Committee,
I am applying for the Assistant Professor position in the Human Centered Design & Engineering at the University of Washington. I am a PhD Candidate in Computer Science, School of Computing and Artificial Intelligence at the University of Wisconsin–Madison. I am advised by Dr. Rahul Chatterjee, writing the final chapter of my thesis, and expected to graduate by Summer 2027.

My research studies how technologies perpetuates gender-based violence (GBV) such as intimate partner violence, labor/sex trafficking, genocide, and environmental destruction. Specifically, how equitable interventions (trainings, tools, and advocacy practices) and research practices (methods, data, and design practices) can reduce and prevent harm among communities, helping them foster healing and safety. To do this, I combine ethnographic, participatory, and design research methods to bridge disciplinary boundaries in and beyond human-computer interaction, security & privacy, sociology, psychology, education, politics, law, history, anthropology, and healthcare. I have made contributions across two interwoven threads: (1) designing interventions to support GBV survivors and frontline providers, and (2) research praxis to surface and liberate from structural violence. I have published 5 and 4 in-review papers at top-tier venues, such as CSCW (honorable mention top 5%), CHI (best paper top 1%), USENIX Security, CCS (top 10 finalist at CSAW applied research competition). I have also presented papers, panels, and workshops at policy, law, and healthcare venues like Wisconsin State Capitol, Cook County Human Trafficking Task Force, *Gaawiin Geyaabi ("no more")*, Women Are Sacred, Reclaiming Our Love, Native Nations Nursing, Helpers, and Healers Summit. I have guest lectured for UW–Madison courses who assigned my papers as course readings in Psychology: Sexual Violence Advocacy and in Social Work: Interpersonal Violence.

Embracing an *advocacy-researcher* practice, I direct the administration, fundraising, outreach, and survivor services at Madison Tech Clinic (MTC), a trauma-informed intervention supports GBV survivors. I have overseen over 180 consultation (over 40 survivors personally) with their digital safety needs. I coauthored five grant proposals, one of which was awarded $750,000 from US Department of Justice to expand our services to 26 urban and rural GBV organizations across 32 counties of Wisconsin, US. I have trained over 200 GBV providers (survivors, health practitioners, legal justice workers, and policymakers) through nation-level (National Network of Ending Domestic Violence, National Indigenous Women's Resource Center, Lac Courte Oreilles Tribal Nation) and state-level coalitions (EndAbuseWI , The Network, Mending the Sacred Hoop). I have also been awarded the Morgridge Fellowship to recognize my community-engaged scholarship.

As a teacher, I strive to cultivate intellectual rigor and compassionate care among students. I will incorporate an interdisciplinary perspective while teaching courses on ethics, social justice, security & privacy, HCI, and research methods. I will set up a community-engaged research program with TECC Clinic (New Beginnings) and extend their services across Washington. To secure funding, I plan to submit grant applications with national agencies (NSF, DOJ, NIH), foundations (Robert Wood Johnson, Sloane), and tech companies. I will build on UW's existing strengths by bringing my interdisciplinary perspective to civic infrastructure and society (expanding TECC clinic in rural Washington), environment and sustainability (harms of AI data centers and resistance movements), and Labor and future of work (extending definitions of AI safety by grounding labor in AI supply chain in Global South). I envision collaborating with researchers such as Emily Tseng (on IPV, improving tech clinics, and AI safety), Sucheta Ghoshal (on counter-computing, data centers, and peoples' resistance, refusal, and sabotage), Kate Starbird (on online political discourses and social media resistance movements), Beth Kolko and Daniela Rosner (on feminist & afro-indigenous AI futures), David Ribes (on relational research infrastructures and historicism), Sean A. Munson (on health interventions), Katya Cherukumilli and Shana Hirsch (on data centers impact on water pollution and resource equity), in Center for an Informed Public, Center for Digital Youth, Technology & Social Change Group, UW ALACRITY Center, Center for Communication, Difference, and Equity, Center on Collaborative Systems for Security, Safety & Regional Resilience, Center for Social Science Computation and Research, Center for Child and Family Well-Being, Responsibility in AI Systems and Experiences, Indigenous Wellness Research Institute, Washington Institute for the Study of Inequality and Race.

Please feel free to contact me with any questions about my application. Thank you very much for your time and consideration.

Sincerely,
Naman Gupta, PhD Candidate, University of Wisconsin-Madison
